Josh,
Thanks for getting back to me. Please let me know what you hear.

On your second question, we would not provide data, documents, and notes used in the newsgathering for the investigation besides what was posted online or published in print as part of the investigation.

Please let me know if you have questions.

Thanks,
John

John,

Thanks for the email. We are working on responding to your questions.

Also, in reference to the article you published Dec. 19, could you please send us the complete laboratory results and any work plan, sampling plan or quality assurance project plan (QAPP) your contractor developed for the sampling?

Thank you.

Josh

In advance of the meeting Saturday, can you look into the questions I sent below? I don't believe I heard back on these. Also, it now appears that the CLCM smokestack on the St. Francis facility has new equipment installed. I am wondering if this is part of what the company meant when it said it was discussing "long-term solutions" on the air emissions violations. And since one of the violations was a failure to monitor emissions, I wondered if that new equipment relates to that position.

Any other updates you can provide are appreciated. Also, can you tell me who from the agency will be there Saturday?

Thanks,
John

Hi Josh,
I see the meeting where your folks will be on hand to discuss CLCM case here in Milwaukee has been set. Can you provide an update on the case now or before the meeting?

In particular, the company indicated it may be settling part of the case with EPA. Also, Wisconsin DOJ says US DOJ is working on its own part of the enforcement. Has EPA referred its case to USDOJ?

My deadline on this is next week Monday by lunchtime.

Thanks, John
